

ATMIS

INDIVIDUAL CAMOUFLAGE

MK8 2D - Basha

Modular Shelter and Personal Concealment Solution

The ATMIS Basha from Wescom Defence is a multispectral shelter system designed for operational security in both static and mobile environments. Designed to reduce thermal and infrared signatures, it delivers advanced concealment against modern sensor threats while remaining fully waterproof, lightweight, and mission ready.

KEY FEATURES & PERFORMANCE BENEFITS

Thermal & IR Disruption

Reflective layers minimise emitted and absorbed heat signatures, reducing visibility to thermal imagers and IR sensors. This helps blend personnel and equipment into the background, lowering the risk of detection by drones or scopes.

Weather-Resistant & Durable

Engineered to withstand harsh environments, resistant to wind, rain, and UV degradation, ensuring long lasting field performance.

High Strength, Low Weight

At just 60 gsm, the ATMIS Basha delivers excellent strength to weight performance, tensile strength and tear resistance), minimising burden without compromising durability.

Lightweight, Compact & Deployable

Durable yet lightweight design enables rapid deployment and easy pack down for dismounted operations or mobile concealment.

MULTISPECTRAL SIGNATURE MANAGEMENT

Provides concealment across VIS, NIR, SWIR, and TIR wavelengths, protecting against a broad range of sensor threats. Ideal for countering night vision, thermal, and drone mounted surveillance systems.

BEYOND THE VISIBLE

The ATMIS Shelter System is built to disrupt detection across the visible, near infrared, and thermal spectrums. Whether static or mobile, it helps reduce signature exposure and enhances concealment against advanced sensor threats.

APPLICATIONS

The ATMIS Basha provides versatile, multispectral concealment, making it ideal for use in:

- + Field Shelters & Observation Posts
- + Reconnaissance & Forward Operating Positions
- + Mobile Operations in Varying Terrains
- + Emergency Hide Systems

SPECIFICATIONS

Property	Detail
Dimensions	260 cm x 220 cm
Weight	0.34 kg (not including poles etc)
Material	Constructed from plain weave Nylon 6.6
Colour	Woodland camouflage (front), solid reverse (no pattern)
Surface	ATMIS MK8 2D
Attachment Points	Allows use as shelter, cover, or wearable

PERFORMANCE STANDARDS

Refer to MK8 2D Technical Datasheets for test data and compliance information.
